2ème PARTIE

Commençant à la page 233, sur papier bleu, se trouvent les noms et les adresses des manufacturiers.

3ème PARTIE

Commençant à la page 393, se trouve une liste alphabétique des articles fabriqués au Canada, donnant les noms de toutes les maisons qui les fabriquent.
Le mot principal en Anglais est ordinairement placé le premier, suivi d' une phrase le modifiant, i.e., Quincaillerie, de construction: Cuir, coupe de bottines et chaussures. Mais, quand l'inversion ne semble pas faisable le mot modifiant est placé le premier, et est ainsi arrangé dans la liste alphabétique, i.e., Mécanisme de piano—Piano hammers; Shoe packs—Chaussures en cuir tanné à l'huile. En cas de doute on peut essayer les deux méthodes. Quand deux noms ou plus sont communément employés pour le même article, nous avons essayé de donner des explications vis-à-vis. Quand on désire l'adresse de la rue, voir la IIème Partie, commençant à la page 233. Les noms des fabricants qui font ou sont intéressés dans le commerce d'exportation sont indiqués par un asterisque*.

4ème PARTIE

Commençant à la page 800c. Section Spécial indiquant les noms des exportateurs principaux des produits de la ferme, etc.

5ème PARTIE

Commençant à la page F-1 sur papier bleu. Section de Traduction—(a) Français, page F-1. (b) Espagnol (édition limité), page S-1. Les noms des articles donnés dans l'Indice Français et Espagnol sont suivis par leur équivalent en anglais, et l'équivalent en anglais se trouve placé alphabétiquement dans la IIIème Partie.

Some Facts About the Canadian Manufacturers' Association

THE Canadian Manufacturers' Association has a history dating back nearly 75 years. It was formed in 1871 and was incorporated by Act of Parliament in 1902.

Its objects, as defined in the Constitution and By-Laws, are "to promote Canadian interests and to further the interests of Canadian manufacturers and exporters, and to render such services and assistance to the members of the Association and to manufacturers generally as the Association shall deem advisable from time to time."

MEMBERSHIP

The Association has a membership of over 5,000 (5,136 at Dec. 31, 1944). The industries it represents are located in 526 centres throughout Canada and 25% of the membership is to be found west of the Great Lakes. 75% of the membership of the Association consists of industries with less than 100 employees. As each industry in the membership has but one vote, irrespective of its size, actual control of the Association thus rests with the large body of smaller industries in Canada.

OFFICES

The Association has its head office in Toronto, but to better serve its members it maintains offices in Montreal, Quebec City, Amherst, N.S., Ottawa, Hamilton, Winnipeg, Edmonton, Vancouver and Victoria, B.C. Each is in charge of an experienced secretary, long in the service of the Association, with a competent staff.

DIVISIONS AND BRANCHES

In order to deal with matters of provincial and local interest to its members, the Association operates five divisions and 23 branches. The Maritime Division has its headquarters in Amherst, N.S.; the Quebec Division in Montreal; the Ontario Division in Toronto; the Prairie Division in Winnipeg and the B.C. Division in Vancouver. There are Provincial branches in Manitoba, Saskatchewan and Alberta and local branches in Brandon, Man., Calgary, Alta., Drummondville, Que., Edmonton, Alta., Granby, Que., Granville Island, B.C., Hamilton-Brantford, Ont., Lethbridge, Alta., Medicine Hat, Alta., Montreal, Que., Moose Jaw, Sask., Niagara Falls, Ont., Ottawa Valley, Ont., Peterborough, Ont., Prince Albert, Sask., Quebec City, Que., Regina, Sask., St. Johns, Que., Saskatoon, Sask., Shawinigan Falls, Que., Sherbrooke, Que., Toronto, Ont., and Victoria and Vancouver Island, B.C.

DEMOCRATIC ORGANIZATION

The Association is organized on democratic lines, paralleling to a certain extent the governmental organization of the Dominion of Canada. The Annual General Meeting represents the electorate as a whole. The Executive Council elected annually by the Annual General Meeting is the Association's Parliament, meeting at intervals during the year to transact necessary business. The Executive Committee is the Cabinet, which reports to and is responsible to the Council. The Divisions parallel the Provinces and their Executive Committees resemble the Provincial Legislatures. The Branches are the municipalities, with their Executive Committees like municipal councils.

SERVICE DEPARTMENTS

The Association prides itself on the expert services it provides for its members through its Division and Branch offices and through its Service Departments at Head Office. These Departments are the Tariff, Transportation, Legal, Industrial Relations, Commercial Intelligence, Insurance, Trade Sections and Publishing. Each is in charge of a well-qualified manager, with a staff of trained assistants.

COMMITTEES

The work of the Departments is directed by Standing Committees, who are elected annually by the Annual General Meeting and who report during the year to the Executive Council. These Committees are composed of members of the Association who are qualified by their work and experience to deal with those subjects coming up for consideration in each of the Committees. For example, the Transportation Committee is composed for the most part of the traffic managers of Canadian industries.

The work of the Divisions and Branches is directed by Executive Committees, with the assistance of other committees dealing with particular subjects. These are elected at annual meetings.

Approximately 1,000 members of the Association serve on the Executive Council, the Standing Committees and the Division and Branch Committees.

Modern Canada Starts Here

Electric Power

KEY TO OUR NATION'S DEVELOPMENT

BEHIND Canada's growth as a modern industrial nation . . . behind Canada's proud record of war production . . . behind all the plans for swift and splendid Canadian development after the war — stands Electric Power! It has powered our factories and mines. It has stepped-up the output of our shipyards, lumber mills and farms. It has been a major factor in raising us, in a few short years, to the position of fourth place among the arms producers of Democracy.

Yet, despite all that Electric Power has done and is doing here in Canada, more and more uses will be found for it in the future. Wisely and widely applied after Victory it can enrich us to an unimaginable degree — with finer cities, worthier homes, added leisure. It can lay the foundation of a still higher standard of living.

But such progress must be planned for. It must be planned for now—by all of us. By you, for your home . . . by you, for your business or farm . . . by you, for your community. True there must be no relaxation of our war effort to-day, yet by planning we prepare for action ahead . . . we prepare work ahead . . . we prepare markets ahead which will absorb our fullest productivity—create employment for all—and thus establish a firm basis upon which our nation's future can be built. Let us "Think Big" and plan big—now!

As "Canada's Greatest Electrical Workshop," Canadian General Electric is proud of the part it has played in the Dominion's electrical progress. For 52 years C.G.E. has been bringing the benefits of electrical living to the people of Canada. NEW FACTS ABOUT METAL CONTAINERS DISCOVERED IN WARTIME

Though war has brought many restrictions in the use of metal containers, it has led to important discoveries, too.

New types of metal containers, as well as new uses for familiar containers have been developed to meet special wartime demands. And many of these discoveries can be applied to a variety of products in the post-war days.

In uncovering these facts, the great laboratory facilities and technical skill of American Can Company played a vital part.

The increased experience, gained by solving the new problems we've had to meet since 1939, has placed us in even better position to help you with your present or postwar packaging problems.

You need only write or call us.

Planning Electrical Requirements?

Time will still continue to be an important production factor in any post-war planning, regardless of generally increased manufacturing facilities.

When reconversion comes be sure you have not underestimated this vital factor . . . *Time.*

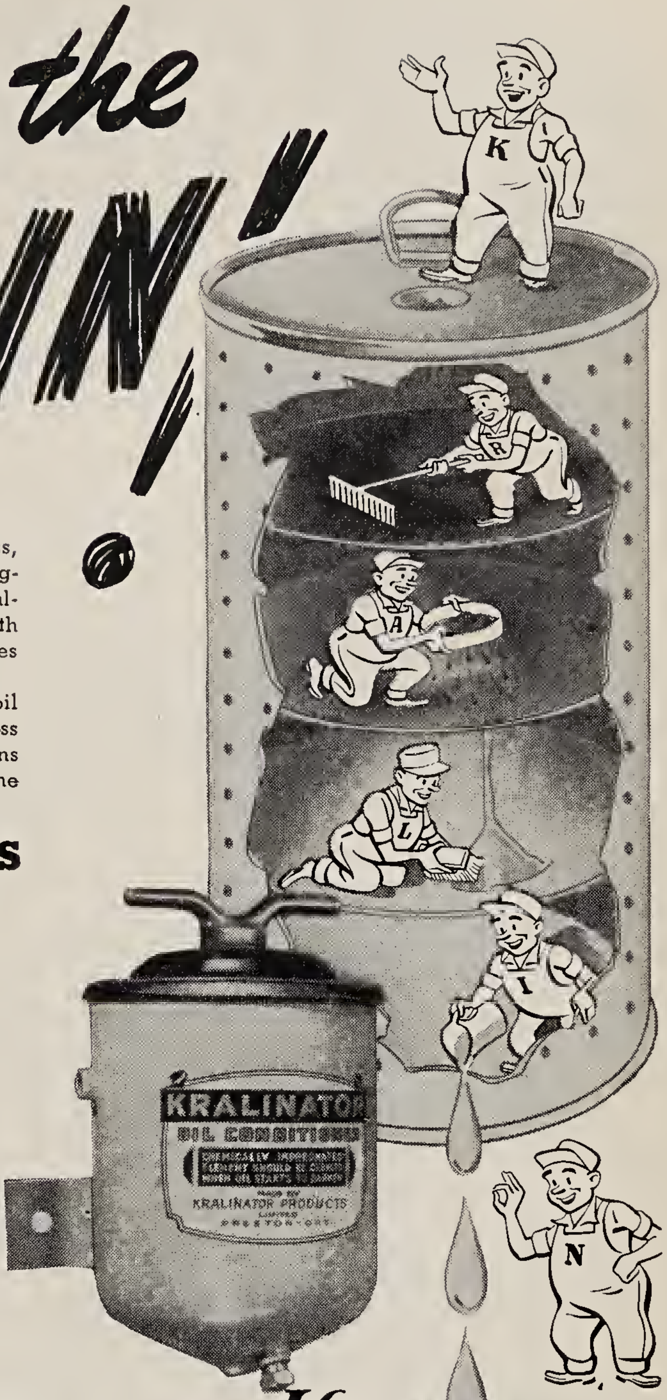
It's all in the KRALIN!



The exclusive KRALIN chemical process, with which all Kralinator Filter Elements are impregnated, does what no filter can do of itself—amalgamates the microscopically small impurities with which dirty oil is saturated into larger particles which are easily trapped.

KRALIN has no direct chemical effect on the oil itself, but by eliminating contaminents which pass freely through ordinary filters it greatly lengthens the useful life of the oil by keeping it clean to the last drop.

SPECIALISTS IN INJECTION MOULDED PLASTICS

Dozens of industries are finding plastics the solution to their production problems. In many cases plastic parts are better and cheaper than metal. In other applications, metals are still the only satisfactory material, either alone or in combination with plastics. Our engineers know the limitations as well as the advantages of plastics.

Where there is any doubt about the reliability of plastics in any particular application, we prefer to advise caution rather than risk the worthy reputation of plastics.

Whether you have an immediate or postwar problem, why not get the expert advice of a "Reliable Plastics" engineer now?
